

‘Diversity Insights’ E-learning Programme

Disability Action Training Service is a social enterprise that delivers quality training. Our training covers all disabilities and is delivered by trainers with disabilities. We are able to bring a wealth of knowledge and experience to the training as well as invaluable ongoing support. No other organisation in Northern Ireland can offer this extensive service.

This innovative training programme is designed to be a flexible resource which participants can complete at a time and place convenient to your business/organisation. This 5 hour online training aims to introduce staff to all aspects of diversity and grasp the concepts at their own pace. It will:

- Raise awareness of diversity relating to customers and colleagues
- Help participants with problem solving techniques and other skills relating to diversity
- Develop a practical understanding of rights and responsibilities in relation to diversity issues in the workplace

The modules take a very practical approach to diversity in the workplace by exploring how to make the information:

- Personal, Organisational, Real and Practical

It is our intention that this E-learning programme will have the maximum impact on your business and with the least time commitment necessary from your business.

All our training is based on a business case that believes that employing the right person for the job, regardless of their background, and expanding your customer base can only be good for business.

We would like to help you in achieving this positive change.
