

Diversity Management for Staff

Disability Action Training Service is a social enterprise that delivers quality training. Our training covers all disabilities and is delivered by trainers with disabilities. We are able to bring a wealth of knowledge and experience to the training as well as invaluable ongoing support. No other organisation in Northern Ireland can offer this extensive service.

Workplaces in Northern Ireland are becoming more diverse. There is an increasing need for all employees to understand that they can contribute to good relations in their organisation. We have developed this 3 hour training programme to give your staff the tools to contribute to a better working environment. Participants will:

- Discuss what diversity management actually means
- Explore what impacts on diversity in your organisation
- Examine what individuals within your organisation can do to better manage diversity

We use a variety of training methods to make our training programmes as interactive as possible. These include DVDs, quizzes, handouts, group work and case studies. Each participant receives training materials for the session as well as reference materials for future use. All our training sessions are fully accessible.

All our training is based on a business case that believes that employing the right person for the job, regardless of their background, and expanding your customer base can only be good for business.

We would like to help you in achieving this positive change.
