

# Housing Project – Overview

## Overall Aim

To encourage user participation by people with disabilities to influence policy and decisions in relation to housing choices.

To do this we intend to:

## Gather case studies:

We will ask disabled people how they have reached a suitable housing solution whether they are owner occupied, private rented and social housing etc. We will try to identify common issues and recommend how to improve the current systems to reach suitable housing solutions.

## Product Working Group:

We will bring together people with disabilities, professionals and manufacturers to study the suitability of the products that are used in people's houses with the intention of refining or designing new products.

To find out more or be involved in the project please contact Laura Cleland:
